

Heminway Pond Dam Removal Project

(Steele Brook – Watertown, CT)

Photo Summary of Project Progress

-- Part 2 --

(Nov. 7, 2018 – 5 days after flow release to new river channel)

November 2018
Susan Peterson
(BWPLR WP&M)

Connecticut Department of Energy and Environmental Protection

Steele Brook was released to its new channel on
November 2, 2018

(It rained heavily in the following days ...)

The following set of photos were taken on
November 7, 2018

Looking upstream from road toward former dam site at new channel with flow

Looking upstream through former dam site at new channel with flow

Looking upstream through former dam site at new channel with flow (left) and tributary (right)

Looking downstream through former dam site at flow in new channel

Looking downstream toward former dam site at new channel with flow

Looking downstream toward former dam site at new channel with flow

Looking downstream at new channel with flow

Looking downstream at new channel with flow

Looking downstream at new channel with flow

Looking downstream at new channel with flow ... Note high flow line marked by woody debris on coconut fiber mat

Looking downstream at new channel with flow

Looking upstream at new channel with flow and root wads

Looking upstream at new channel with flow ... Note coconut fiber mat caught on bolder mid-stream, which was moved from streambank by heavy rain and high flows

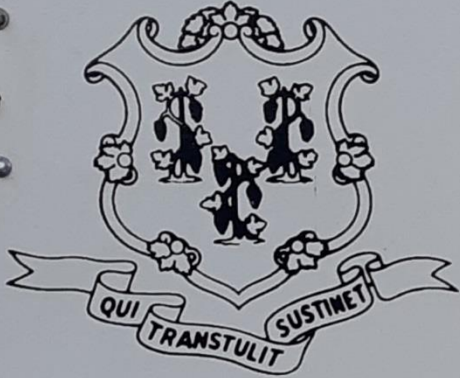

Looking upstream at new channel with flow and root wads

Water flow in new channel
